

Things NARALO has accomplished since Brussels:

1. NARALO has members on each of the four work teams for At-Large improvements and work is progressing. Each work team was able to meet in Cartagena and to present to the group.
2. We formalized the NARALO founding principle of empowering individuals who are unaffiliated with ALSs. We made the necessary changes to create a formal voice and for these unaffiliated members, and are proud to announce Eric Brunner-Williams (who is in attendance at this meeting) as the first person elected to this role.
3. NARALO members play key roles throughout the At-Large policy development processes, helping to drive issues such as registrants' rights, bringing good sense to the new gTLD process, and holding ICANN accountable for its enforcement activities.
4. We are planning a NARALO showcase for the San Francisco meeting. Together with local ALSs we are hoping to be a great host to the ICANN community.
