ICANN Org Comments on European Data Protection Board (EDPB) Recommendations 01/2020 on Measures That Supplement Transfer Tools to Ensure Compliance with the EU Level of Protection of Personal Data

22 December 2020

ICANN submitted a comment to the European Data Protection Board, concerning its recommendations 01/2020 on measures that supplement transfer tools to ensure compliance with the European Union (EU) level of protection of personal data. This comment follows ICANN org's comment submitted to the European Commission (EC) on 10 December 2020 concerning the EC's updated standard contractual clauses for transferring personal data to non-EU countries. ICANN org's comment raises concerns related to the potential impact of the recommendations, particularly related to transfers of personal data from the European Union to the United States. This comment encourages the European Data Protection Board to adopt a risk-based approach to determining the safeguards that must be applied to make the transfer of data GDPR-compliant. The full comment submitted by ICANN org is available here.

All contributions to public comment will be available on the EDPB website.

Board Activity on the Third Accountability and Transparency Review

ICANN's Bylaws-mandated reviews are an important accountability mechanism that enable us to maintain a healthy multistakeholder model. The Accountability and Transparency Review is one of four Specific Reviews anchored in the ICANN Bylaws. It is a thorough examination of ICANN's execution of its commitment to maintain and improve robust mechanisms for public input, accountability, and transparency to ensure that the outcomes of its decision-making reflect the public interest and are accountable to the global Internet community. ICANN is obligated to conduct this review periodically.

Earlier this year, the third Accountability and Transparency Review Team (ATRT3) delivered its Final Report to the ICANN Board. This report was then posted for Public Comment to help inform the Board's action on the final recommendations.

DNS transport: The race is on!

2020-12-17   **BLOG**

Not one, not two, but three new protocols are offering internet transport layer options for the Domain Name System (DNS). We must not lose sight of the dernier cri (last shout) though. Here is a quick look at the catalogue of options and opinions on DNS over TLS (DoT), DNS over HTTPS (DoH) and DNS over Quic (DoQ).

Diversity at any price? IETF looking for a new chair

2020-12-16   **BLOG**

The ongoing search for a new IETF Chair offers the community a possibility to look into diversity issues and choose a candidate sponsored by one of the newer participants in the standardisation process. It is unfortunate that the most plausible candidate from the standpoint of diversity, is sponsored by Chinese vendor Huawei, who is currently locked in a trade war with the US.

Transparent censors and other extensions of extended error codes

2020-12-14   **BLOG**

The DNS Working Group of the IETF is continuing to expand the DNS code base with both new features and enhancements to previous features. In the latest session, a proposal on private space in the DNS with two letter codes received mixed comments, while the policy-heavy work on the operational fall-out of DoH is still not welcome.

INDUSTRY and IG NEWS

Dear All,

The IGF 2021 Call for Thematic Inputs is open until 31 January, 23:59 UTC.
All stakeholders are invited to share Internet governance issues of priority that could shape the IGF 2021 thematic focus. More information is available at the IGF website
https://www.intgovforum.org/multilingual/content/igf-2021-call-for-thematic-inputs

Also, we kindly remind that the call to share feedback on IGF 2020 format and logistics and suggest improvements for IGF 2021 is open until 20 January:
https://www.intgovforum.org/multilingual/content/taking-stock-of-igf-2020-and-suggesting-improvements-for-igf-2021

It would be much appreciated if you would share this information across your networks.

We also invite you to have a look at
The List of proposals for EuroDIG2021.

EuroDIG 2021 will be planned as a hybrid format, with both an on-site event in Trieste, and remote participation options. While remote participation has been a longstanding practice, new ways to enhance this experience will build on the lessons learned in 2020.

Happy New Year!

Dear EURALO and At-Large, ICANN community members,

Let's say goodbye to the old year and meet the New 2021! The Year, which will open new horizons for us and will give an opportunity to make all our dreams come true!

We appreciate this challenging outgoing year for the showing us that we are able to work together in extraordinary way and we are more than community, we are the real family.
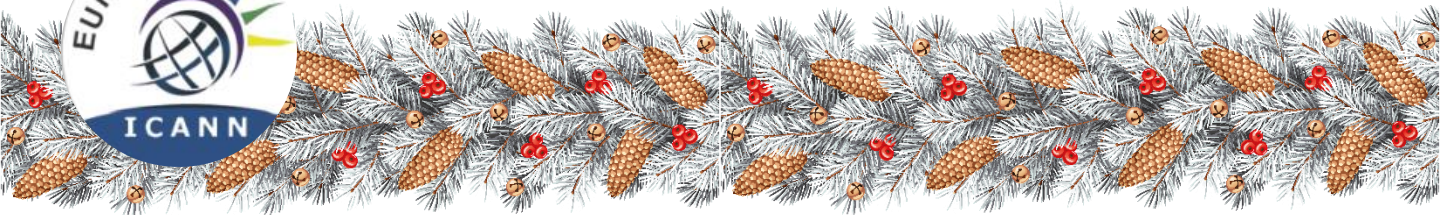

We really thank everyone for the outstanding efforts you made to enhance our community and make our working days more interesting, fruitful and sometimes funny.

Dear all,
Happy New Year! Be healthy!
See you!
