(1) ICANN Operations cash expenses excludes Depreciation and Bad Debt.

(2) The FY21 contingency expense represents an amount of budgeted expenses unallocated to specific activities or functions.

- FY21 Funding is projected to be 6% lower than FY20 Forecast as the economic impact is projected to affect ICANN org funding beginning in FY20-Q4
- FY21 Personnel costs are projected to increase due to inflationary increases and a modest increase in headcount
- FY21 Travel is higher as it assumes travel restrictions being relaxed and holding all 3 face-to-face ICANN Meetings whereas FY20 includes 1 face-to-face and 2 virtual meetings

Funds Under Management FY21 Adopted Budget

- FY21 Operating Fund balance is projected, in the base case scenario, to be above the target balance of \$32.5M* despite the economic crisis primarily due to ending FY20 with a surplus

*The targeted balance of the Operating fund is 3 months of operating expenses (~\$32.5M based on FY21 Adopted Budget)

FY22 Planning Process and Next Steps

Preparing for FY22 planning

- ⦿ FY21 will be a year where the consequences on ICANN of the global pandemic will be monitored carefully.
- ⦿ The lesson's learned from the FY21 plan development process is that the ICANN community, the ICANN Board and ICANN org have much work to accomplish and this work needs to be planned for and prioritized given limited resources.
 - Work to be prioritized include:
 - Operating Initiatives in the new Five-Year Plan
 - Implementation work: Adopted policies, review recommendations, advice, WS2
 - In addition to the on-going policy development community work.
- ⦿ The Operating Initiative in the FY21-25 Operating Plan provides a framework to improve the overall ICANN planning process.

Operating Initiative Planning at ICANN

- The FY21-FY25 Operating Plan contains an Operating Initiative Planning at ICANN with the following Strategic Goals and Targeted Outcomes:
 - ICANN org prioritizes its activities to deliver its mission in the global public interest in the most cost-effective way.
 - ICANN org has processes and tools in place to effectively manage and control costs.
 - Financial accountability and responsibility guide how decisions are made prior to committing ICANN's resources and how expenses are managed once approved in order to stay within those commitments.
 - Key cost drivers are clearly defined and understood.
 - Risk assessments are periodically reviewed to determine the adequacy of ICANN's Reserve Fund level to address potential mitigation needs.

Operating Initiative Planning at ICANN

	Quantification of resources	Evaluation of needs	Prioritization	Flexibility	Transparency
Increase narrative description of activities and projects		✓			✓

Planning at ICANN Next Steps

- ⦿ ICANN is initiating the Operating Initiative “Planning at ICANN” during the planning cycle of FY22 (happening during FY21).
- ⦿ This involves updates on a rolling basis to the five-year plans (strategic, operating and financial)
 - Strategic Outlook Trends Identification is the input to the strategic planning process.
- ⦿ Collaborating to prioritize ICANN’s community and org work is a key objective driving the design of the FY22 planning process.
- ⦿ Next step: ICANN org to propose an FY22 planning process during the month of August 2020.

Potential Implementation Projects and Activities

- ICANN org supports the community-based activities, which leads to reviews recommendations and cross-community working group recommendations, policy drafts, and advice recommendations.
- At any point in time, there are such recommendations and policies that are at any of these stages of progress: initiation, development, finalization, board consideration, implementation planning, implementation.
- As recommendations and policies move forward and reach the stage of Board consideration, ICANN org can then design the expected implementation work.
- The resources supporting the implementation of these activities consist mainly of the ICANN org staff contributing as required based on the nature of implementation work.
- Some additional specific resources may be required on a case by case basis. During the annual planning cycle, the implementation activities expected to be occurring during the year planned for are incorporated into the annual operating plan.

Contingency and Activities in Progress

- Only activities supporting the implementation of Board-approved policies or review recommendations are specifically included in the FY21 Proposed for Adoption Budget
 - Implementation activities for policies or review recommendations not yet approved by the Board will be scheduled, if and when approved by the Board, on the basis of resources reallocated from other activities
- Contingency is an amount of expenses included in the budget, but not allocated to any specific activities
- The progress of the following key projects will be supported by staff and may trigger unbudgeted third-party expenses which would require contingency funding:
 - Operating Initiatives requiring resources incremental to prior years
 - New gTLD Subsequent Procedures policy development process (PDP)
 - Adopted recommendations from Specific and Organizational Reviews
 - Policy development and compliance required by GDPR.
 - The Cross-Community Working Group on Enhancing ICANN Accountability, Work Stream 2
 - Other unanticipated expenses

FY21 SO/AC Additional Budget Requests

- Background: separate budget process to allow SO/ACs to express funding requests customized to their specific needs
- Process includes the following phases:
 - Application phase (with evaluation criteria)
 - Evaluation phase with 2-step review process (Staff and Executive)
 - Presented to the BFC for recommendation for approval
- A total of 35 Requests were submitted by 14 different organizations
