Universal Acceptance

UA Day
#Internet4All

Celebrating
Universal Acceptance Day 2023

Tuesday 18th April, 2023
9:00 A.M. - 1:00 P.M. Atlantic Standard Time

Join the discussion

About this Event:

Universal Acceptance (UA) is a technical measure that ensures all valid domain names and email addresses, regardless of script, language or character length, can be equally used by all Internet-enabled applications, devices, and systems.

One of the issues that need attention in considering the future of the Internet is the fact that there is the growing use of Internet domain name (IDN) extensions with non-Latin scripts such as Chinese, Arabic, Hindi or Russian. No longer will a large segment of the Internet uses Latin script in languages like English, Spanish, French and Portuguese. It is therefore, important to build awareness around access to services which use these top-level domains, including web browsing, email, or other Internet applications.

The Internet is evolving into a multilingual entity and the Caribbean region cannot be left behind.

What You Will Learn?

This awareness-building session will include discussions on:
- technical barriers that may hinder access to Internet services on a rapidly developing multilingual Internet;
- benefits of being UA-ready;
- basic technical concepts related to UA;
- the next steps to becoming UA-ready.

Who Should Attend?

- Business Owners
- I.T. Managers
- Software Developers
- ICT Educators
- I.T. Students
- System Administrators
